Menlo Park Notebook #176 [N-80-00-07]

This is the third of three notebooks that contain the results of a search, conducted by Otto Moses during the summer of 1880, for literature relating to the electric light. (See also Menlo Park Notebooks #127 and #128.) The citations are listed in alphabetical order by author. There are two sets of listings, beginning on pages 2 and 88. The book contains 284 numbered pages.

Blank pages not filmed: 98-284.

Electr. Note on a phenomenon of polarity in the
-lysis decomposition of gas by the electric spark,
and on the products obtained in decompos-
-ing alcohol by the electric spark or heat.
Comptes Rend., XLVI., 1858.. 903-905.

Photo. On a photometer proposed by M. de
-metry Maistre for measuring the splendor
of stars.
Bibl. Univ. LII., 1833.. 212-216

Dyna. Means of suppressing residual mag-
-nos.. netism. &c.
Am. Telegraphe. II., 1859.. 409-413

On the distribution of an electric
current in metal plates.
Pogg. Ann. XCVII., 1856.. 382-386

Loop. On the changes of temperature which
Clamp. a galvanic current produces by its
passage through the contact surfaces
of two heterogeneous metals.
&c., LXXXIX., 1853.. 377-402.

Quintus-Icilius, G. von., 4.

Raymond, G. M., 6.

Reade, J. B., 3.

——, 9.

Reden, E. von., 2.

Loop. On the numerical value of the constants in the formula for the electro dynamic heating of metallic wires.
Pog. Ann. CI., 1857. 69-105.

Pho-tometer. Letter on the photometer of M. Nicod.
Bibl. Univ. II., 1816. 240-242.

Fibre. On the chemical composition of vegetable membrane and fibre.
Phil. Mag. XI., 1837. 421-428.

Mould. The process of charring vegetable tissue as applied to the examination of the stomata in the epidermis of garden rhubarb.
Micros. Soc. Trans. I., 1844. 40-43.

Dyna-mos. On the employment of electro-magnetism as a motive power.
Dingler Polyt. Journ. LVIII., 1840. 332-337.
